

Charles Luxton

Software Engineer

Phone (518) 531-6448
Skype charles.g.luxton
Email charles.g.luxton@gmail.com

I am a motivated, versatile engineer who has experience working with:

Portfolio cluxton.github.io
LinkedIn au.linkedin.com

- Native mobile applications. iOS and Android — Java, Swift, C#
- HTML and CSS
- Frontend javascript — React, AngularJS
- Web application frameworks — Spring, .NET MVC, express
- REST apis
- Server and cloud automation — AWS, Heroku, Ansible
- RDBMS or NoSQL databases.
- Continuous integration and delivery — Jenkins, Go

I enjoy working anywhere in the tech stack for mobile and web applications and will always take the opportunity to learn something new. I have worked closely with QAs, business analysts, UX and UI designers and will happily jump into other roles when required.

I'm looking for a team of similarly motivated and passionate people. If that sounds like you, I would love to hear from you!

Employment

Suncorp Group — Software Engineer — November 2012 - February 2016

Suncorp Group is the parent company of some of Australia's largest insurers and one of the top banks. After an internship, I had the privilege of joining the Suncorp Business Services graduate program in 2013 and continuing as a software engineer in 2015.

During that time:

- I played a key role in developing Suncorp Bank's first native mobile application for iOS and Android. The application sees thousands of daily users.
- I was selected to participate in a three month "lean startup experience". This was an initiative that took four Suncorp employees and placed them in the [River City Labs](#) co-working space (with access to mentors) while working on a project.
- Travelled to India to assess vendor software and visit our off-shore partners.

SAP Research — Developer — January 2011 - February 2012

After completing the second year of my degree, I had the opportunity to do one year of paid, full-time work while earning credits towards my degree.

Freelance developer — 4 months - 2012

During the final year of my degree, I did some freelance development work using Java and Spring.

Education

Queensland University of Technology 2009 - 2012

Bachelor of Information Technology. Majoring in Software Engineering

Visa status

I am currently living in Brisbane, Australia and wanting to relocate to New York. For any on-site interviews I will be in New York from late March to early April.

I am eligible for the [E3 Visa](#). It lasts two years, is indefinitely renewable and has **no sponsorship cost**. All I would require from an employer is:

- Employment offer
- [Foreign Labor Certification](#) (ETA 9035) filed with the Department of Labor.

Once the foreign labor certification has been filed, I can arrange my visa and relocate in a matter of weeks.
